

Profile

I work at the intersection of design, engineering, and business—translating stakeholder needs into production-ready digital products.

With 13+ years in UX, design systems, and component architecture, I specialize in rapid prototyping and building scalable React applications. I create interfaces that are both technically sound and user-centered.

I focus on turning design systems into functional code and collaborating across teams to deliver end-to-end experiences.

Currently advancing my German and Python skills, with an interest in knowledge graphs and AI systems.

Berlin, Germany

Skills

DEVELOPMENT

- React & React Hooks
- Component Architecture
- HTML5 / CSS3 / JavaScript
- Tailwind CSS
- Shadcn/ui Component Library
- Responsive Web Design
- Git Version Control
- API Integration

DESIGN & PROTOTYPING

- Figma to React Workflow
- Design Systems
- Wireframing & Prototyping
- User Research
- UI/UX Best Practices
- Accessibility (WCAG)
- Information Architecture

REACT FRONT END UI

- [Event Operations Automation](#)
- [Conversational Travel Planning](#)
- [Lead Sequence Orchestration](#)

TOOLS & PLATFORMS

- Figma
- Sketch
- Zeplin, Storybook
- Jira, Trello, Asana
- Tableau, Analytics
- CRM Platforms
- WordPress, CMS

Work Experience

Full-Stack Developer & UX Designer | NeuroFlow Learning Platform

Personal Project | 2026 <https://atharux.com/cases/Neuro>

- Developed React-based learning platform with drag-and-drop kanban, XP progression, and 82 coding exercises featuring Monaco editor integration and real-time validation
- Implemented 3D isometric skills graph using ReactFlow with AI-recommended learning paths, depth-based progress visualization, and interactive filtering across 7 programming courses
- Designed responsive glassmorphism UI with dark/light themes, command palette (⌘K), and accessibility features for optimal user experience

Technologies: React • React Router • ReactFlow • Vite • JavaScript ES6+ • UI/UX Design • Data Visualization • Gamification • Responsive Design • Accessibility • LocalStorage API • Drag & Drop • Monaco Editor • Git

Co-founder

Rising Tide Berlin, Berlin, Germany Dec 2023 - Present

- Designed sustainable products from automotive cast-off leather
- Produced sustainable pop-up events with artists from Berlin and California, including a 3-day artist residency in the Loire Valley, supporting local charities and businesses
- Developed local partnerships for sustainability-focused events

Fractional Director UX Design

Startup (NDA Client), Remote - Contract May 2024

- Architected 30-page Figma design system using Shadcn/ui
- Translated design system into production-ready components with custom glassmorphic UI patterns
- Delivered a tokenized design system for a complex SaaS desktop application with modern component architecture

Marketing Developer / Campaign Strategist Chef Works, Inc.

Chef Works, Poway, California, USA Oct 2018 - Jan 2024

- Built HTML/CSS email templates and landing pages, increasing click rates from 9% to 45% and generating \$150K+ annual sales growth

Education

Bachelor of Fine Arts

Digital Media Art
SJSU, San Jose, CA, USA
2005

A.A. Liberal Arts

De Anza College, Cupertino, CA, USA
1999

- Developed data visualization dashboards using Tableau for campaign performance tracking
- Designed and implemented a gamified dashboard UI, increasing S&R team productivity by 25%
- Created customer journey mapping and persona development frameworks across 4 revenue streams
- Implemented GDPR-compliant data segmentation systems for email marketing automation

UX/UI Designer & Prototyper

Volt 480, Remote - Contract

Sept 2018 - Sept 2018

- Delivered working interactive prototype within 2 weeks for tradeshow presentation, securing next-phase funding
- Built a responsive, clickable prototype demonstrating core workflows

Marketing Project Manager

Epik Token, Remote - Freelance

Nov 2017 - Oct 2018

- Designed and built product website and whitepaper materials for blockchain startup launch
- Developed presentation materials and tradeshow assets, contributing to a \$2M investment raise

Product Designer

Vinder, Remote - Freelance

Sep 2017 - May 2018

- Led Agile design sprints and design-to-development handoff
- Built a design system with reusable React Native components
- Created production-ready specifications, wireframes, and prototypes

Technical Project Manager/ Designer

Virtual Fantasy League, Remote - Freelance

Nov 2016 - Sept 2017

- Established design and development SOPs for product delivery
- Managed cross-functional teams to deliver a complete product in 9 months
- Provided technical direction and design specifications to the development team

User Experience Architect

Tandon Group, San Jose, California, USA

Jan 2016 - Oct 2016

- Redesigned and built B2B medical services website, securing 3 major contracts
- Designed and developed RFID technology website, leading to \$250,000 in sales
- Rebuilt jewelry retail site with improved UX/UI and conversion optimization
- Managed development, SEO, and email campaign integration

iOS App Review/ UX Designer

Apple, Cupertino, California, USA

Sep 2010 - Jan 2016

- Designed a productivity app, increasing team efficiency by 25%
- Developed app review workflow policies and best practices documentation, and influenced process workflow improvements
- Reviewed 100,000+ apps annually with a focus on UX quality standards
- Managed developer appeals and provided technical UX feedback
